

MAIL 24/7 4224 W. Charleston Blvd., Las Vegas, NV 89102 Print Products

What can you say about printing? Either you know what you want, or you need help designing something about which you only have a general idea.

A perfect example would be business cards. There are any number of companies that produce business cards virtually for free. One print shop in Canada, offers free cards, if you are willing to wait a few weeks. They print your cards on the edges of larger jobs, and provide them as a promotional item. Any number of local shops can duplicate your existing card for prices ranging from \$19.00 per thousand and up.

We, of course, don't compete in that market. We are service oriented, and prices range from \$10.00 per hundred, up to \$50.00 per thousand, with several choices in between. We print our cards on the highest quality 12pt high gloss cover, double sided, in order sizes as small as a hundred cards. We work with you to get the effect you desire, at a fair price. There is no extra charge for design, and most orders are available same day.

Need something larger? 4x6 post cards or larger promotional materials, door hangers, and posters up to 12x18 or 18x12 are no problem. Full color, and double sided if you desire. Priced from 1 piece to several hundred, call for details. There are just too many combinations to enumerate here. No order is too small, and if is too large, we will try to find you a shop big enough to take care of your business.

Flyers, printed on 20 lb book, 8.5 x 11, in white, or color paper, black and white are only .05 per page in orders of 500 pages or more, .07 from 200 to 499 and .10 up to 100. Other options include high gloss 30lb paper and full color printing one or both sides, call for price quote and delivery time. You can email your questions, request for quotes, or artwork, to our main email address, available on our home page.

Last but not least, we have various finishing options for our print products, too numerous to mention here. Please review our section on Binding, which includes cutting, folding, stapling, laminating, hole punch, spiral and thermal binding and even mailing.
