

MAIL 24/7 4224 W. Charleston Blvd., Las Vegas, NV 89102 Shipping Guide

Shipping can involve you bringing your package, already packed, and bearing a prepaid shipping label, or it might mean you walk in with an irregularly shaped, fragile object, and rely on us to weigh it, pack it, ship it, and insure it, at a minimum of effort on your part. It may be a guitar, a bicycle, or aunt Martha's picture, framed in a two hundred pound wooden frame. Whatever it is, we can handle it.

Like most things in life, the more you do for yourself, the less it costs. Conversely, the more services we provide, the higher the fee. But suppose there are considerations other than simply cost, such as size of the box, contents, special handling like COD or delivery receipt, domestic or international. How about convenience? Have you ever stood in line at the post office, even in July? (Have you ever not stood in line?) And what about real decision making information? Sure you could look up one shipper or another on the internet and request quotes, but try to compare information from four shippers using an apples and apples comparison, and you are lost before you get started. That is where Mail 24/7 can help. We use Postalmate shipping software from PC Synergy, which allows a side by side comparison of four different shipping options on the same screen, all based on the facts surrounding your proposed shipment. You can view the U.S. Post Office, FedEx Overnight, FedEx Ground, and DHL Worldwide, all at the same time, reviewing pricing and delivery times, for both domestic and international shipments. We can help you prepare customs forms, and any labels required to ship, all in moments, while you wait. We won't send you out the door over a piece of tape, we do sell supplies, but are not stingy with customers. It's all about service, which is why we hope to have you as our customer soon. Feel free to call with any questions, or even better, stop by and take a look. We will look forward to your visit.
